Q: SAPUI5 List/Details not displaying well after using Map I'm trying to create a list/details from a cfc like so: The problem is that the title attribute from the List is not displayed as it should. If I inspect the text of the elements, it's the correct id and tag... Any idea why the title attribute is not displayed properly? Table of Contents Brushes Brushes are tools in Photoshop that allow you to paint or erase portions of an image. In some cases, they are the only tool needed to accomplish a desired effect. In other cases, they are one of many tools used in a particular effect. A brush can be used to: Crop an image. Remove blemishes. Fill areas with a color. Create thin or thick lines. Crop an image By opening an image in Photoshop, selecting Image > Crop, and using the tools provided, you can easily crop an image to be the proper size for that image. All of the functions in the Crop tool are dependent on the size of the file. The tool also provides a drag function to move and resize the crop window. Fill areas with a color The Fill or Eraser tool can be used to fill an area of an image with a particular color. This tool is available in the Toolbox (just click the icon). There are four options that are available when using this tool: Controls the opacity of a new layer being added. You can use this to get into areas of an image that may be hidden underneath another layer or behind a pattern layer. This is particularly useful when matching colors, since the tool will reveal more of the layer beneath as the opacity is increased. Uses a brush to paint out an area. The Eraser tool can be used to paint out an area by selecting the icon with the eraser on it and clicking an area of the image. You can use the same brush from the Brush tool to do this, or you can use an entirely different brush. The Brush Tool allows you to choose a brush from the Toolbox. To select a brush from the Toolbox, either double-click on the Brush icon (if your Brushes are in alphabetical order), or click on the icon, and open the Brush window by clicking the arrow button. Draw thin lines and thick lines. To draw a thin line or create a shadow, select the Brush tool, click on the T icon, and draw over the area of the image you wish to draw an outline around. To draw a thick line, select the Brush tool, click on the B icon and then click on the area of the image you wish to fill. You can also use the Brush tool to create
